

**WHY? Interns.** You have a passion and specific skills. You need some solid business experience to put your knowledge into practice. You'd love to deliver virtually on a project, in an industry of your learning, anywhere in the world.

**Corporates.** Work overload stops you from getting those back-burner projects off the ground. You would like some new insights, some fresh new energy, an intern with passion and drive to take your project and push it to completion.

Imagine a match-making platform that seamlessly puts the two of you together... That's NX.TCert

**Pétanque NX.T**  
creating tomorrow's business, today

**HOW IT WORKS**

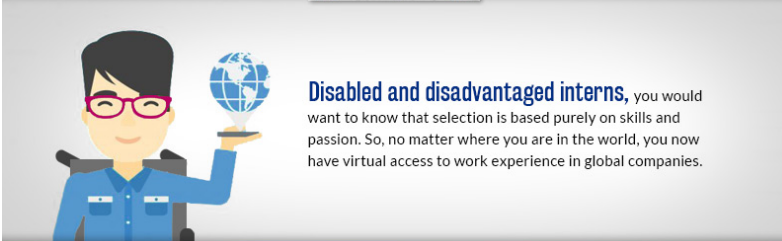

1. Interns register and post their CVs, skills, and certificates on the platform.
2. Companies register, and use tick-the-box filters to search for an intern as a fit for their project or campaign, 6 months or more. Filtering includes certificates, degrees, core competencies, skill sets e.g., marketing, research, engineering, finance...
3. The company selects up to 5 interns for a virtual interview.
4. Only when a match is made the company pays \$99 and the intern pays \$9.

The **BIG differentiator** is the NX.TCert Blockchain Certificate. Issued upon completion, it gives details and verification of the internship. A QR code offers recruitment officers globally the benefit of trust and speed to authenticate job applications.
